WHERE WE ARE

Filling the gap

PRIME Website (1/5)

MyPRIME

The central members' area, MyPRIME, offers you a wide range of new benefits:

Access documentation 24/7 - Product agreements, accounting guides, performance reports, operational instructions and many more.

Marketing Centre - Here you can access all design assets including logos, barcodes, labels and creative brief templates for selling PRIME products, saving you time.

Support from the PRIME team - Engage with us on all areas from operational questions to sales and marketing.

Submit forms online - Process Force Majeure claims quickly and easily through this new capability.

IMRS

Product Description

(1/2)

- **What is IMRS?**
- **International Merchandise Returns Service**
- It enables posts to offer a low-cost, tracked cross-border returns service.
- It allows consumers from e-buyer Posts to return POSTAGE PAID - unwanted products to the country of origin where the selling Post is located.
- It can be associated to any kind of Product the Origin Post has used to send the item to the country of Destination.
- Labels, obtained through the IPC-CRP, can be either included in the parcel or electronically sent to the buyer.

IMRS

Product Description

(2/2)

Key concepts

Tracked cross-border packets returns service

LU barcoded item in UX and UN dispatches

POSTAGE PAID returns for the consumer

Weight up to 2kg or 5kg

No signature required

Lowest-cost option for tracked cross-border packet returns for Post

IBRS similar layout

IMRS

Remuneration

Remuneration for IMRS divided in two different levels

- **Core remuneration:**
 - The IMRS surcharge shall be 0.80 SDR per item to cover the light tracking and the handling costs at the retail counters
 - The additional remuneration of 0.80 SDR will be calculated by PRIME on the basis of the EMC scans sent from the e-Buyer Post to the e-Seller Post
- **Ad-hoc remuneration:**
 - The non-core member is: United Kingdom. The rates will be decided bilaterally

IMRS

Set up requirements (1/5)

To start with the country setup on the CRP platform some information need to be provided in advance to configure the systems and support specific Posts requirements

The PRIME return label is standard, but there is some room for the Posts to decide whether they will need a customer's receipt, customer reference number, etc....

Single Label Overview

2. CN22	1. Main Label	3. A Receipt with Stamp 3. B Receipt with Instructions
4. A Customer Instructions Free Text (Part I)		4. B Customer Instructions Free Text (Part II)

IMRS

Set up requirements (2/5)

1. **Main label:** Is the piece that will always be attached to the shipment. Contains the sender / receiver information, PRIME logo, S10 Barcode, Product name, Postage paid identifier ...

FROM: NAME CONTACT NAME street 1 896 1 street 2 street 3 1234 CITY Switzerland	PRIORITY PRIORITAIRE		NE PAS AFFRANCHIR <hr/> POSTAGE PAID
INTERNATIONAL MERCHANDISE RETURNS SERVICE			
RÉPONSE PAYÉE / REPLY PAID			
PERMIT NO none	UNITED STATES		Optional text 1 Optional text 2
Tracking #  # LU 000100091 CH #		TO: NAME CONTACT NAME street 1 896 1 street 2 street 3 1234 CITY United States	
Post Office - scan the above barcode			

4. Customers Instructions:

The Buyer Post could include additional text and instructions to the customer in order to clarify & describe the process. Below you can find an example. This element is optional and is part of the initial setup per Buyer Posts

<p>Customer Instructions:</p> <p>Follow the process to initiate a return of your item:</p> <ul style="list-style-type: none">• Print this document onto a piece of white A4 paper.• Cut the label along the dotted line.• Affix the top part of the label securely to the front of the item you wish to return using clear tape ensuring the label is clearly visible; do not apply tape over the barcoded area.• Please ensure your parcel is securely packaged. Please see at www.anpost.ch for tips on packaging your item correctly.• Each label can ONLY be used once.	<p>Customer Instructions:</p> <ul style="list-style-type: none">• The item can be posted at any Post Office.• An automatic receipt will be issued which will contain the tracking number for this item. <p>Tracking can be checked at www.anpost.ch</p> <p>Note: Post Centres and Rural Delivery drivers may not be able to provide an acceptance scan. If your parcel is lodged in a posting box, it will not receive an acceptance scan.</p>
---	--

IMRS

Set up requirements (5/5)

When accessing the agreement Members shall act as e-Buyer Posts being e-Seller Posts is optional

More signatories are needed to make it run properly

Signatories: DK, GB, PT and SE

PRIME Matrix

PRIME Matrix contacts information about:

- PRIME Signatories to the Agreements
- Implementation of Delivery Standards provided by Members
- GCSS usage per product
- Data exchange information

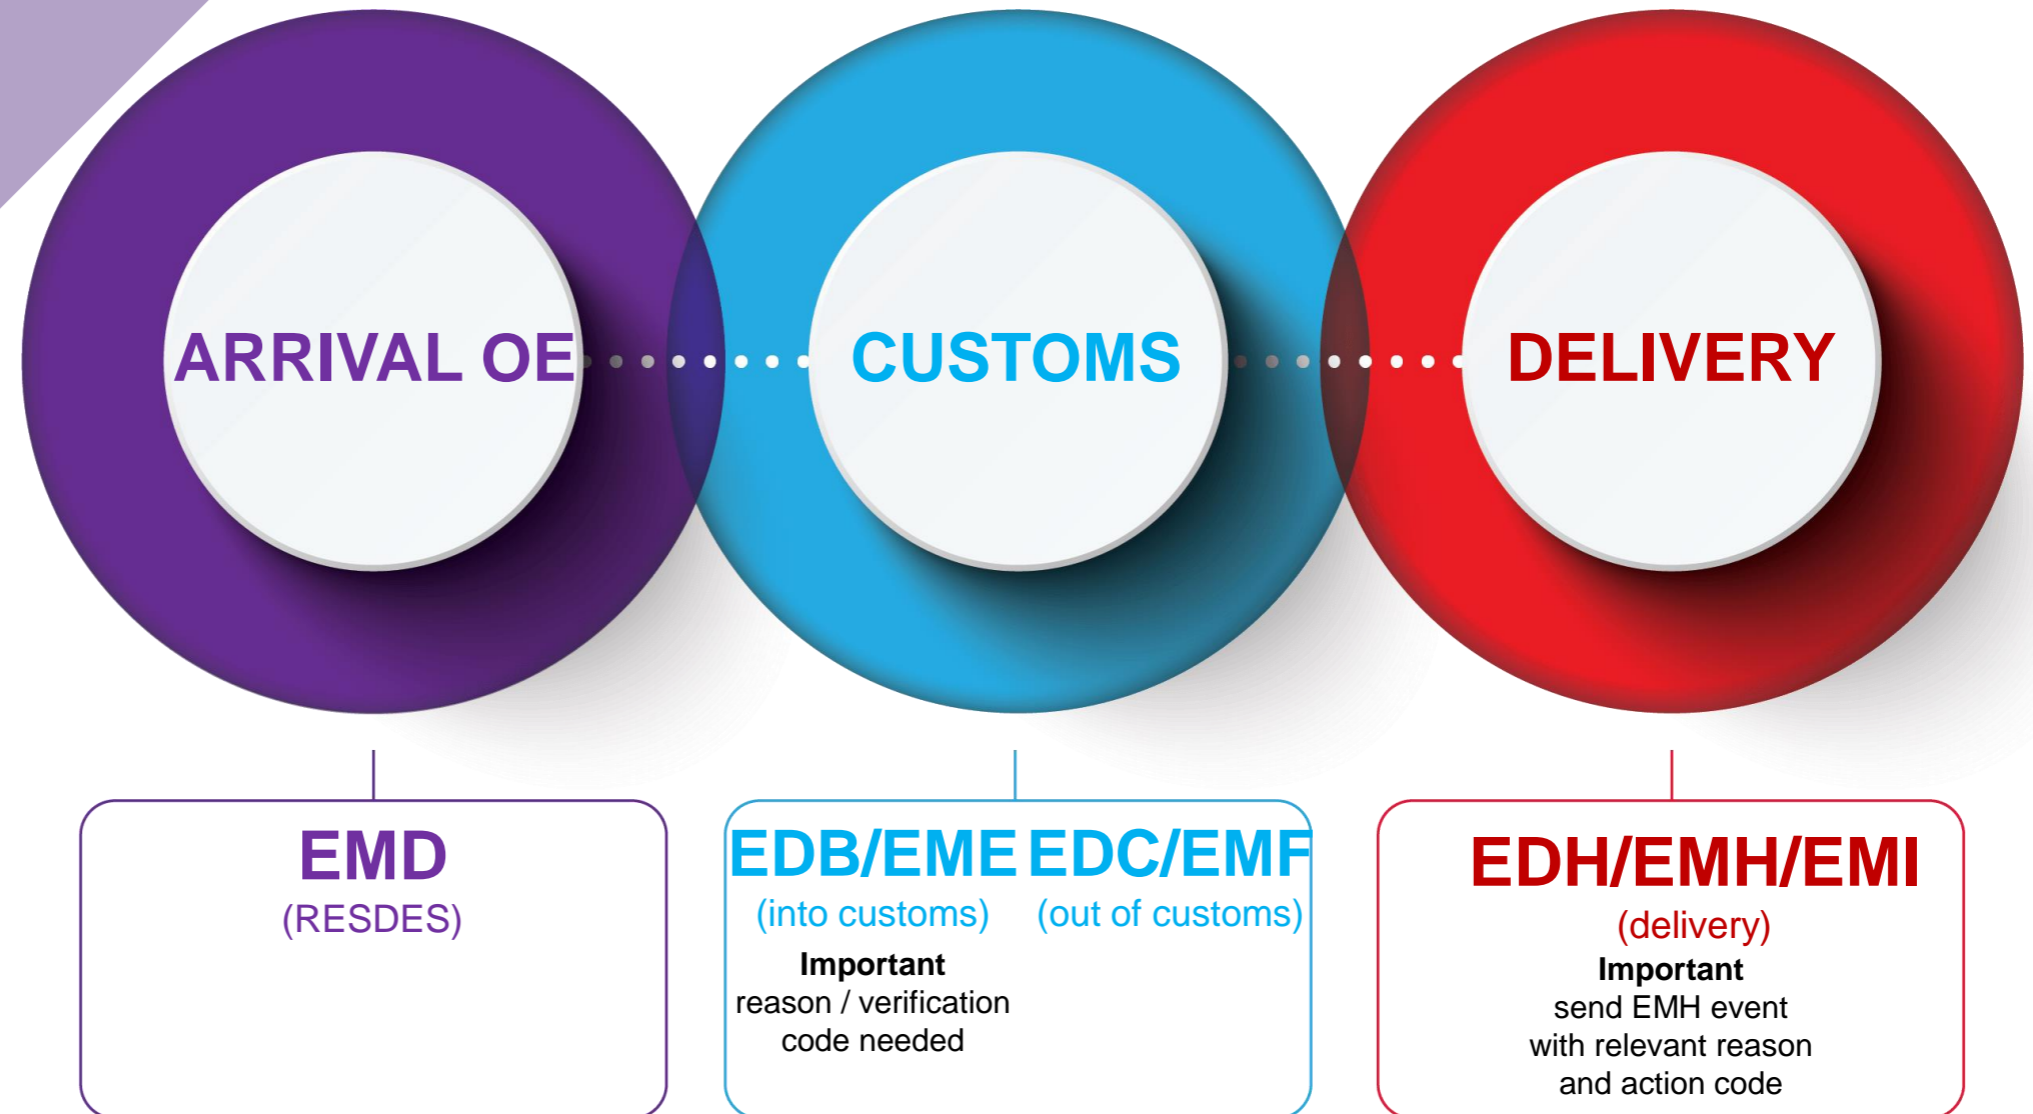

[P:\Matrix\PRIME_MATRIX_September_2022 \(NE\).xls](P:\Matrix\PRIME_MATRIX_September_2022_(NE).xls)

PRIME Team distribute PRIME Matrix in the beginning of every month.

In the communication PRIME Team informs members about any new updates like:

- New signatory or Member
- Changes in Delivery Standards and Holidays
- Changes in GCSS

Operational procedures (1/9)

Operational procedures (2/9)

Mandatory events

* **EMSEVT V3 – as from 1st January 2023 mandatory!!!**

EMD event upon arrival of the item at the O.E.

EDH/EMH/EMI event when a delivery attempt is made (successful or not) or when an item is made available for pick up.

Recommended events

EDB event when an item goes into customs.

EME event with a valid action and reason code if customs hold the item.

EDC event when an item is retrieved from customs.

EMF event when an item leaves the OE.

Operational procedures (3/9)

Events transmission

Events need to be transmitted using the XX350 mailbox.

Inbound events need to be transmitted to the XX350 mailbox of the origin **post as per the barcode suffix.**

Events transmitted to a wrong mailbox are rejected for different reasons, for instance not including returns in the reports.

Some posts are transmitting inbound events to the XX350 mailbox of the origin **country** (not post) when they don't match in the EMA event. These events are rejected.

Operational procedures (4/9)

Reporting cut-off time

PRIME reports are produced monthly.

Performance reports are only produced for the signatories of the agreements, whereas End to End (E2E) reports are produced for all PRIME members.

Reports for a month consider events transmitted up to 23:59 of the calendar day before the 9th working day in Brussels of the following month.

This allows items received at the end of the month to be included in the reports.

Operational procedures (5/9)

Time in customs deduction

Time in customs is deducted if the necessary events are correctly transmitted.

Time in customs is calculated between the **earliest of EDB/EME** and the **earliest of EDC/EMF**.

EME will only be valid if it bears a valid action and reason code.

If EDB and EME have the same timestamp, EME prevails.

Cut-off time is only applied to the arrival of items at the OE. It is not applied for out of customs events.

Operational procedures

(6/9)

Carry-forward rule

The carry forward rule is applied to items that should not be reported on yet. These items are carried forward to next month's report.

The carry forward rule changed in 2021, in order to have a simpler process.

New carry forward rule (applied from April 2021): Items with an EMD in the reported month but without a delivery event (EDH, EMH or EMI) at the moment of the reporting run (=the 9th working day of the next month), are carried forward to the next month. An item is carried forward only once. If it still has no delivery event the next month, it is reported on as 'missing delivery'.

Operational procedures (7/9)

Missent/misrouted rule

The missent/misrouted rule was implemented to avoid transit items from penalizing transit post performance.

Transit items should not receive an EMD scan, but an EMJ and an EMK.

If a post realizes an item that received an EMD is a transit or a missent item, the following events should be transmitted:

1 EMC or EMK to the origin post, with the final destination as destination

1 EMC or EMK to the correct destination post, with the final destination as destination.

Operational procedures

(8/9)

EDX rule

Items with an EDX and no further delivery events are excluded from the volume in delivery calculation to avoid unfair penalizations.

However, if an item gets a delivery event after the EDX (but before the reporting cut-off), the EDX will be disregarded and the item will apply for payment normally.

Delivery standards (1/2)

Delivery Standards are a crucial aspect for remuneration under the Registered and Exprès agreements.

Registered → aligned to the most similar domestic product.

Exprès → fastest delivery network for letter-mail.

Two features: OE for EMD and **delivery office ID** for EDH/EMH/EMI.

The files can be set in ranges instead of individual delivery office IDs.

It is important to keep the Delivery Standards updated including all **offices and parcel lockers**.

Force Majeure

(1/5)

Definition of Force Majeure as of 1st January 2021,

Force Majeure is the term used to describe an unexpected and disruptive event which has caused a PRIME operator to fail to perform its obligations owing to an impediment beyond its reasonable control.

Force Majeure is divided into two distinct groups: Short Term and Long Term.

For Short term FM is intended any event that is linked to a duration of less than 30 days.

In PRIME there is no minimum duration of Short Term FM.

For Long Term is intended any FM that is linked to an event with a duration equal or over 30 days (a full reporting run). The COVID-19 falls into the Long Term FM.

For reporting purposes, only for Short Term FM days in which the networks were disrupted will be excluded from the performance calculation.

Force Majeure

(2/5)

Rules for the Implementation of Force Majeure

Only PRIME members with valid delivery standards may invoke Force Majeure.

The Head of PRIME will confirm in each case whether Force Majeure will be applied, according to the rules.

PRIME members can apply for “Force Majeure” by notifying Head of PRIME by e-mail within 24 hours of the incident using the Force Majeure form available on the PRIME website. The Head of PRIME will forward the information to all PRIME members.

No communication sent to other international organizations will automatically be considered by PRIME. A specific request needs to be sent to PRIME directly through the compilation of the Force Majeure Form on the PRIME website.

Force Majeure

(3/5)

Short Term FM:

FM under 30 days duration is intended as a short FM and days affected are considered as non-working days both for on time info return and for on time delivery. Short FMs are not applicable to Covid-19 related FMs. All Covid-19 FMs regardless of the period are considered as Long FMs and their application is for a full reporting run.

For reporting purposes, the days which the PRIME service was disrupted will be excluded from the performance calculation.

The above process is also applied if the disruption affects only one part of the national coverage. However, in this case, the PRIME member shall make clear in the FM Form what areas are affected and their respective delivery office codes, which will be excluded from the measurement during the period of disruption. These delivery office codes need to be the same value as the ones defined in the delivery standards.

Force Majeure (4/5)

Long Term FM:

FM equal or longer than 30 days duration is intended as a long FM and the days affected will have fixed remuneration for the on time delivery only.

This is respectively 0,64 SDR fixed for Exprès and 0,1 SDR for Registered independent of the real quality achieved.

No impact of the FM is given to the on-time info return.

The reports will reflect the real achieved quality even if the remuneration is fixed at the values indicated above.

Force Majeure (5/5)

<https://www.prime-posts.com/myprime/support-services-2/more/force-majeure-form/>

PRIME Force Majeure Request

Designated Operator * Date of request by Operator (not over 24 hours from start of FM) *

Requesting Person's name *

Start date of Force Majeure * End date of Force Majeure *

Description of the problem that led to the application for force majeure: *

Reasons for invoking Force Majeure *

Does the problem affect your entire territory? * If not, please detail the delivery office value as determined in the delivery standars affected by the problem *

Does the problem affect your customer services call centre? * If yes, please detail the name/code of the call centre affected by the problem and which product(s) it serves *

PRIME Reports

E2E Reports

(1/8)

End to End (E2E) reports

E2E reports are produced for all PRIME members.

They measure the time taken in each of the legs, and also from origin to delivery.

Leg 1 goes from EMA to EMC

Leg 2 goes from EMC to EMD

Leg 3 goes from EMD to EDH/EMH/EMI

PRIME Reports

Leg3 breakdown per country

(1/8)

Leg 3 breakdown per country (OE report)

This report shows a breakdown of the time items spent at the OE, in customs and in the delivery network.

The information is displayed by country and also by OE.

The report only includes delivered items, and excludes all items missing delivery info.

The carry-forward rule is applied to allow items held by customs or en-route to be included in the next month's report, as in the performance reports.

The report includes L, R and V prefixes.

PRIME Reports

Leg3 breakdown per country (2/8)

Leg 3 breakdown per country (OE report)

The report has 3 tabs:

Prime Leg 3 breakdown report: **Time in the OE**

Prime Leg 3 breakdown report: **Time in customs**

Prime Leg 3 breakdown report: **Time in the delivery network**

PRIME Reports

Leg3 breakdown per country

(3/8)

Leg 3 breakdown per country (OE report)

Prime Leg 3 breakdown report: **Time in the OE**

Time in the OE is measured from EMD to the earliest of EDB/EME.

Time from the earliest EDC to the latest EMF is added to the time in the OE.

If there are no EDB/EME events, time in the OE is measured from EMD to latest EMF or earliest EDC if no EMF event.

If an item doesn't have EDC/EMF, time in the OE cannot be measured.

PRIME Reports

Leg3 breakdown per country

PRIME Reports

Leg3 breakdown per country

(5/8)

Leg 3 breakdown per country (OE report)

Prime Leg 3 breakdown report: **Time in customs**

Time in the OE is measured from earliest of EDB/EME to earliest of EDC/EMF.

If an item doesn't have both EDB/EME and EDC/EMF time in customs cannot be measured.

PRIME Reports

Leg3 breakdown per country (6/8)

PRIME Reports

Leg3 breakdown per country

(7/8)

Leg 3 breakdown per country (OE report)

Prime Leg 3 breakdown report: **Time in the delivery network**

Time in the delivery network is measured from latest of EDC/EMF to earliest of EDH/EMH/EMI.

If an item doesn't have both EDC/EMF and EDH/EMH/EMI time in the delivery network cannot be measured.

PRIME Reports

Leg3 breakdown per country (8/8)

PRIME Reports

Valid Action Reason Code (1/4)

Valid Action Reason Code

This report was created to check the amount of EDX, EME and EMH scans and the validity of the action and reason codes.

The data is separated by origin country for each destination.

The scope of the report is items having EMD event.

The validity of action and reason codes is checked against the official UPU code lists (available on the UPU website):

- 111 – EME retention codes for EMSEVTv3 events
- 112 – list of reason codes for EMSEVTv3 events
- 112a – action/reason combination (EDX, EMH) for EMSEVTv1 events
- 113 – action codes for EMSEVTv3 events
- 112b – allowed reason codes per event for EMSEVTv3 events

The Carry Forward rule is applied, but not the Import Terminated (EDX) rule.

PRIME Reports

Scanning Trend Performance

(1/7)

Scanning Trend Performance

The Scanning Trend Performance Report gives you an overview of scans corresponding to EMD or PREDES, it can't be fully compared to the performance reports one on one, because some of the rules for example Carry Forward rule and Import Terminated (EDX) rule is NOT applied.

The first tab of the Scanning Trend Performance Report provides an explanation of what can be found in the report.

Outbound - vs EMD tab - includes all outbound items with an EMD event in the reporting period;

Outbound - vs PREDES tab - includes all outbound items with a PREDES event in the reporting period;

Inbound - vs EMD tab - includes all inbound items with an EMD event in the reporting period;

Inbound - vs PREDES tab - includes all inbound items with a PREDES event in the reporting period;

PRIME Reports

Scanning Trend Performance

(2/7)

Prime scanning trend performance : Outbound - vs EMD

'J' column - Number of items with EMD in the reporting month

'A' - 'AK' columns - scanning performance for the Outbound traffic of the operator. In each column there are counted the numbers of items with EMD in the reporting month that have been scanned with each of the corresponding events (EMA, EMB, EMC, EXA, EXB, EXC, EXD, EXX, EMC, EMJ, EMK, EMD, EDA, EDB, EME, EDC, EMF, EDD, EDE, EMG, EDF, EDG, EDX, EDH, EMH, EMI, Predes, Resdes)

'AL' column - 'EDH or EMH or EMI' - the total number of Outbound items with an EMD in the reporting month that have been scanned with at least one of the delivery events (EDH,EMH or EMI)

'AM' column - 'EDH,EMH and EMI' - the total number of Outbound items with an EMD in the reporting month that have been scanned with all of the following scans : EDH,EMH and EMI event

'AN' column - 'EMH and EMI' - the total number of Outbound items with an EMD in the reporting month that have been scanned with EMH event and EMI event

'AO' column - 'No (EDH,EMH and EMI)' - the total number of Outbound items with an EMD in the reporting month that have not been scanned with any of the following delivery events : EDH,EMH or EMI

'AP' column - '% (EDH or EMH or EMI)' - the percentage of the Outbound items which were delivered (which have received at least one of the delivery events EDH,EMH,EMI) out of the total number of items with an EMD in the reporting month

Prime scanning trend performance : Outbound - vs Predes

'J' column - Number of items with PREDES in the reporting month

'A' - 'AK' columns - scanning performance for the Outbound traffic of the operator. In each column there are counted the numbers of items with PREDES in the reporting month that have been scanned with each of the corresponding events(EMA, EMB, EMC, EXA, EXB, EXC, EXD, EXX, EMC, EMJ, EMK, EMD, EDA, EDB, EME, EDC, EMF, EDD, EDE, EMG, EDF, EDG, EDX, EDH, EMH, EMI, Predes, Resdes)

'AL' column - 'EDH or EMH or EMI' - the total number of Outbound items with a PREDES in the reporting month that have been scanned with at least one of the delivery events (EDH,EMH or EMI)

'AM' column - 'EDH,EMH and EMI' - the total number of Outbound items with a PREDES in the reporting month that have been scanned with all of the following scans : EDH,EMH and EMI event

'AN' column - 'EMH and EMI' - the total number of Outbound items with a PREDES in the reporting month that have been scanned with EMH event and EMI event

'AO' column - 'No (EDH,EMH and EMI)' - the total number of Outbound items with a PREDES in the reporting month that have not been scanned with any of the following delivery events : EDH,EMH or EMI

'AP' column - 'EMD or BagScan' - the total number of the Outbound items which have been scanned for EMD event or RESDES from the total number of Outbound items with a PREDES in the reporting month.

'AQ' column - '% EMD over Predes' - the percentage of the Outbound items which have been scanned for EMD event from the total number of Outbound items with a PREDES in the reporting month.

'AR' column - '% EMD or BagScan over Predes' - the percentage of the Outbound items which have been scanned for EMD event or a RESDES from the total number of Outbound items with a PREDES in the reporting month

PRIME Reports

Scanning Trend Performance

(3/7)

Prime scanning trend performance : Inbound - vs EMD

'J' column - Number of items with EMD in the reporting month

'A' - 'AK' columns - scanning performance for the Inbound traffic of the operator. In each column there are counted the numbers of items with EMD in the reporting month that have been scanned with each of the corresponding events(EMA, EMB, EMC, EXA, EXB, EXC, EXD, EXX, EMC, EMJ, EMK, EMD, EDA, EDB, EME, EDC, EMF, EDD, EDE, EMG, EDF, EDG, EDX, EDH, EMH, EMI, Predes, Resdes)

'AL' column - 'EDH or EMH or EMI' - the total number of Inbound items with an EMD in the reporting month that have been scanned with at least one of the delivery events (EDH,EMH or EMI)

'AM' column - 'EDH,EMH and EMI' - the total number of Inbound items with an EMD in the reporting month that have been scanned with all of the following scans : EDH,EMH and EMI event

'AN' column - 'EMH and EMI' - the total number of Inbound items with an EMD in the reporting month that have been scanned with EMH event and EMI event

'AO' column - 'No (EDH,EMH and EMI)' - the total number of Inbound items with an EMD in the reporting month that have not been scanned with any of the following delivery events : EDH,EMH or EMI

'AP' column - '% (EDH or EMH or EMI)' - the percentage of the Inbound items which were delivered (which have received at least one of the delivery events EDH,EMH,EMI) out of the total number of items with an EMD in the reporting month

Prime scanning trend performance : Inbound - vs Predes

'J' column - Number of items with PREDES in the reporting month

'A' - 'AK' columns - scanning performance for the Inbound traffic of the operator. In each column there are counted the numbers of items with PREDES in the reporting month that have been scanned with each of the corresponding events (EMA, EMB, EMC, EXA, EXB, EXC, EXD, EXX, EMC, EMJ, EMK, EMD, EDA, EDB, EME, EDC, EMF, EDD, EDE, EMG, EDF, EDG, EDX, EDH, EMH, EMI, Predes, Resdes)

'AL' column - 'EDH or EMH or EMI' - the total number of Inbound items with a PREDES in the reporting month that have been scanned with at least one of the delivery events (EDH,EMH or EMI)

'AM' column - 'EDH,EMH and EMI' - the total number of Inbound items with a PREDES in the reporting month that have been scanned with all of the following scans : EDH,EMH and EMI event

'AN' column - 'EMH and EMI' - the total number of Inbound items with a PREDES in the reporting month that have been scanned with EMH event and EMI event

'AO' column - 'No (EDH,EMH and EMI)' - the total number of Inbound items with a PREDES in the reporting month that have not been scanned with any of the following delivery events : EDH,EMH or EMI

'AP' column - 'EMD or BagScan' - the total number of the Inbound items which have been scanned for EMD event or RESDES from the total number of Inbound items with a PREDES in the reporting month.

'AQ' column - '% EMD over Predes' - the percentage of the Inbound items which have been scanned for EMD event from the total number of Inbound items with a PREDES in the reporting month.

'AR' column - '% EMD or BagScan over Predes' - the percentage of the Inbound items which have been scanned for EMD event or RESDES from the total number of Inbound items with a PREDES in the reporting month

PRIME Reports

Flat Files

(1/6)

Flat files

Flat files (FF) are item level files that contain detailed information about each item.

Information goes from the barcode, OE, and dispatch information to the date and time scans were transmitted.

FF also show the status of each item for payment features and the service standard considered for on-time delivery.

FF are uploaded monthly to the FTP. Each country has unique credentials to access the FTP.

It is recommended to save a copy of the FF every month.

PRIME Reports

Flat Files

(2/6)

How to access?

Please visit: <https://ftp.ipc.be> and use your credentials:

PRIME Exprès

Login: PRI_XX

Password: XXXXXXXX

Login: RLT_XX

Password: XXXXXXXX

PRIME Tracked:

Login: TRACKED_XX

Password: XXXXXXXX

Please contact PRIME team for your credentials.

PRIME Reports

Flat Files

(3/6)

What to look at?

They can be used to filter information and address quality issues.

By filtering the status columns and making pivot tables, posts can drill down and find quality issues related to particular post offices, dates, lack of customs events, etc.

Posts with big volumes have several FF if they have more than 1 million items, which allow them to open the FF with Excel.

FF also include items from countries that are not in the agreements.

PRIME Reports

Flat Files

(4/6)

Types of flat files

Payment items (all) (_payitm_D and _payitm_O)

- This file contain all items based on the same criteria as the performance reports:
 - EMD in the reporting month (not only the ones in the measurable volume).
 - The items carried forward from the previous month.

Rejected events (_rejevn)

- This file contains all rejected events that were sent by that operator in messages with a preparation date in the reporting month.

PRIME Reports

Flat Files

(5/6)

Types of flat files

Resdes no EMD (_resdes_no_emd_D and (_resdes_no_emd_O)

- This file contains items that received a RESDES scan but didn't receive an EMD scan in the reporting month.

Carried Forward (Carried Forward_D and Carried Forward _O)

- This file contains items that received an EMD scan but didn't receive a delivery scan (EMH/EDH/EMI) in the reporting month.

PRIME Reports

Flat Files

(6/6)

Types of flat files

Import Terminated (Import terminated_D and Import terminated_O)

- This file contains items with an EDX and no delivery events

Held – En Route (_HeldEnroute_D and _HeldEnroute_O)

- This file contains the items held-in customs and/or en-route with and EMD (US-RESDES) in the reporting month.
- Based on the old Carry Forward rule, we will stop producing this FF as from 1st of January 2023

PRIME Reports

Performance reports (1/5)

Performance reports

Performance reports are only produced for the signatories of the agreements.

They measure quality, and are the basis for the payment rates in the reckoners.

They are produced both for an outbound and inbound perspective.

Besides performance calculations, they show other relevant information such as number of PREDES/RESDES.

PRIME Reports

Performance reports

(2/5)

Performance reports

What to look at?

#PREDES vs #RESDES

#EMD vs #PREDES/#RESDES

Delivery scanning % (items missing delivery info)

On-time info return & on-time delivery

No standards & out of sequence

PRIME Reports

Payment Reckoners

(1/5)

Payment Reckoners

Payment reckoners are only produced for the signatories of the agreements.

They apply the quality from the reports, to calculate the payment for each link.

The same file contains both for the outbound and inbound perspective.

Payment reckoners contain aggregated quarterly data. December files contain the information for the whole year.

Payment Reckoners

What to look at?

In Expres, on-time delivery is applied to all items with an EMD if scanning is 80% or higher.

In Registered, on-time delivery has two different thresholds (70% or 80%) depending of on-time info return %.

In Tracked, on-time delivery is shown in the reports but it is not a feature for payment.

Instructions to get the credentials

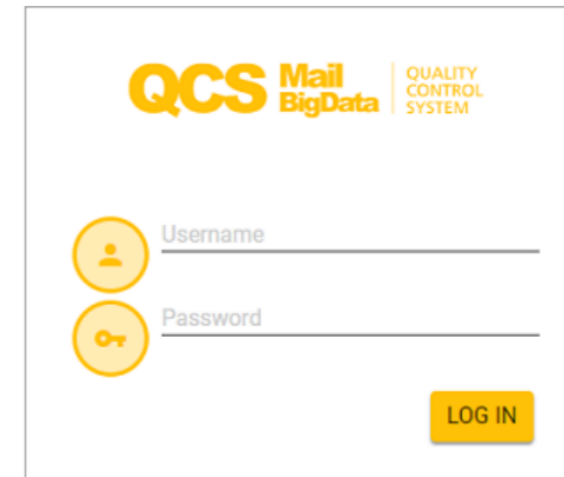

PTC

Before logging in, you must already have a QCS Mail Big Data user account created for you. Request an account through <https://support.upu.int/>

To log into QCS Mail Big Data, you need to have access to a machine with an internet browser, as well as the login credentials from your QCS Mail Big Data administrator.

Procedure

1. Go to <https://qcsmailbd.ptc.post/hQCS.Web>.
2. Enter your Username then your Password.
3. Click LOG IN.

ITMATT

(2/7)

ITMATT

IPC

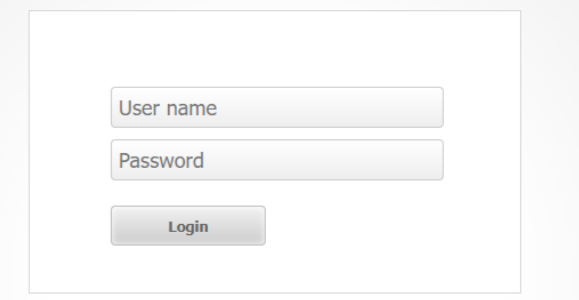

Before logging in, you must have an IPC MSTR user account created for you. Request an account through prime@prime-posts.com

If you are an existing user, contact PRIME Management Team (prime@prime-posts.com) that PRIME ITMATT Project can be added for your disposal

In both cases, provide following information: name, e-mail address and country code (ISO)

Procedure

1. Go to <https://reporting.ipc.be/MicroStrategy/asp/Main.aspx>
2. Enter your Username then your Password.
3. Click Login.

The screenshot shows a login interface with three input fields: 'User name', 'Password', and a 'Login' button. The fields are arranged vertically, and the 'Login' button is positioned below the 'Password' field.

PRIME Reports

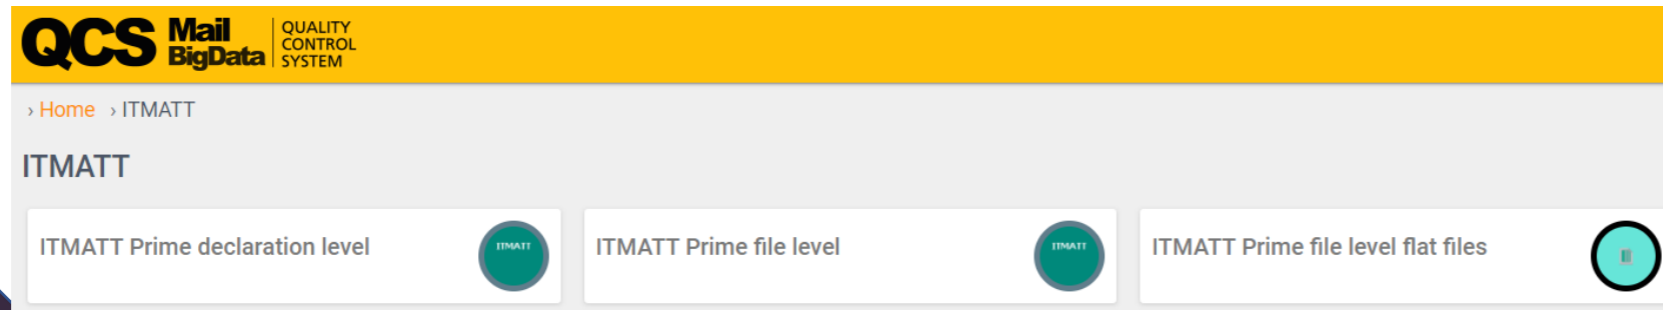

ITMATT

(3/7)

ITMATT

Both PTC and IPC ITMATT reports include 3 reports:

- ❖ File level reports
- ❖ Declaration level reports
- ❖ Flat files

- ❖ PTC ITMATT reports exclude GXS to GXS traffic
- ❖ IPC ITMATT reports are designed for the PRIME members on GXS

PRIME Reports

ITMATT

(4/7)

ITMATT

File level report:

The File level reports show how many files (ITMATT messages) are sent per link, and how many of these have errors (on message level).

PTC and IPC reports are similar, but IPC reports drill down into more detail

PTC reports:

- ❖ Drill down to an individual month

year	Month	Total files
2021	09	5
2021	09	2
2021	09	36
2021	09	4070

- ❖ No reference to individual items

Files with import errors	
For origin: AEA, destination: SKA, year: 2021, month:	
INTREF	Error
12345	The element 'message' in namespace 'm30'

- ❖ Technical presentation of error

Error
The element 'message' in namespace 'm30' has invalid child element 'docref' in nar
Extract of the XML document: line: 1; <message xmlns="m30"> line: 2; <docref>1</docref>

IPC reports:

- ❖ Drill down to an individual day

Year/Month/Day	Total Number of Files
2021/10/01	9
2021/10/04	17
2021/10/05	10
2021/10/06	9

- ❖ Includes drill down to items

Item ID	Validation Error
RR991267102AT	Mandatory field missing
RR991427935AT	Mandatory field missing

- ❖ Compact presentation of error

Validation Error	Data Element	Error Value
Invalid country code	party.sender.postal-address.country-code	At
Mandatory field missing	content-piece[0].origin-location	?

PRIME Reports

ITMATT

(5/7)

ITMATT

Declaration level report:

Report provides an overview of the total volume for the selected link(s)

PTC and IPC reports are very similar, but PTC reports drill down to item level

ITMATT

ITMATT Flat files:

PTC and IPC Flat files are very different

- ❖ PTC Flat files: Same information as File level report
- ❖ IPC Flat files: Monthly detailed information per item
 - ❖ Includes all items with an inbound event in the specified month
 - ❖ One row per item

Item ID	From	To	First Inbound Event	Earliest Inbound Event Datetime	ITMATT Network Time	PREDES Network Time	Declared as Gift	With Postage	With Declared HS	Code List Validation Error
